**Western University's Faculty of Social Science is a centre of research excellence, connecting students and research to the world around them.**

## Message from the Dean

The Faculty of Social Science at Western had another great year in 2018. We made several exceptional faculty hires, launched the Network for Economic and Social Trends (NEST), and took major steps towards establishing a new cross-disciplinary professional Master's degree in Social Research and Policy.

Despite the limitations imposed by the recent 10 per cent decrease in Ontario post-secondary tuition, the Faculty remains in a very sound fiscal position. In fact, we have budgetary approval to make new tenure-track hires in 2019-20, continuing our focus on faculty renewal.

We continue our efforts to provide exceptional instruction for students by exposing our students to world-class research. Tenure track faculty – who typically devote 40 per cent of their job to research – are usually best suited to introduce students to new research because they do it themselves.

We have taken great efforts to reallocate funds from part-time instruction to full-time faculty positions. In 2015, only 44 per cent of our courses were taught by full-time faculty; in 2019-20 almost 75 per cent of our courses will be taught by full-time faculty. We accomplished this by freeing up almost \$5 million in annual budget through retirements, and saving more than \$2.5 million through more efficient course offerings. These savings will allow us to make almost 50 tenured or tenure-track faculty hires between 2016 and 2020, which amounts to more than one quarter of our tenured/tenure-track faculty complement.

Our efforts to increase our research profile through increased research support and faculty renewal have clearly worked: The 2019 QS World University Rankings placed social science at 84th in the world, up from 148th in 2015. In a competitive global market, this level of improvement in such a short period is remarkable. In many ways, we are reinventing ourselves.

Although we are still working on our mission for faculty renewal, it is now so well entrenched that we have time to look at other ways we can move the Faculty forward. As I move into the last year of my first term as Dean, our focus will move towards:

- reviewing our undergraduate programming to take advantage of new opportunities and new expertise;
- introducing our new MA in Social Research and Policy;
- exploring the possibilities for other new professional graduate programs;
- solidifying and promoting our research strengths in equality, prosperity and governance, by increasing the prominence of NEST; and,
- embarking on a significant outreach and fundraising campaign to support these initiatives.

As you will see in this report, we have accomplished much this past year. You will also see we have great plans for the coming year.

Sincerely,

*Robert Andersen,*  
Dean, Faculty of Social Science

Our Faculty has the largest number of students on campus. It is also one of the largest and most diverse Social Science Faculties in Canada. The Faculty includes eight core Departments – Anthropology, DAN Management, Economics, Geography, History, Political Science, Psychology, and Sociology – and the interdisciplinary Department of Women's Studies and Feminist Research, which, for planning and budgetary purposes, resides in the Faculty of Arts & Humanities.

**Jamie Baxter**  
Associate Dean,  
Graduate Studies

**Joan Finegan**  
Associate Dean,  
Undergraduate Studies

**Margaret McGlynn**  
Associate Dean,  
Faculty and Operations

**Ken McRae**  
Associate Dean,  
Research

## Leadership Transitions

In 2019, four of our Departments will welcome new Chairs. These Chairs will bring their own experience and knowledge as they take on leadership roles in growing departments. Working with their faculty members, these Chairs will build on the successes of their predecessors and work to achieve the strategic goals of their departments and the Faculty of Social Science.

### **Tim Conley – Department of Economics**

Conley has been with the Department of Economics for nine years. He previously served as Graduate Chair for the Department. Conley works in Applied and Theoretical Econometrics, both analysing data directly and developing analytical methods.

### **Matthew Lebo – Department of Political Science**

Lebo, who joins Western in August 2019, is currently Chair of the Department of Political Science at Stony Brook University. Lebo works on politics and political parties in the United States and the United Kingdom, focusing on how politicians and political parties structure and coordinate choices to win legislative battles and win elections.

### **Wolfgang Lehmann – Department of Sociology (Acting Chair)**

Lehmann has been with the Department of Sociology for 16 years. He is currently Undergraduate Program Chair. Lehmann works on the interplay between structural factors and individual agency in school-work transitions.

### **Geoff Wood – DAN Department of Management & Organizational Studies**

Wood, who joins Western in July 2019, is currently the Dean and a Professor of International Business, at Essex Business School at the University of Essex. Wood works on the relationship between institutional setting, corporate governance, firm finance, and firm level work and employment relations.

# Achieving our Strategic Goals

The goal of the Faculty of Social Science is to be the best possible place for excellent faculty and staff to work and for students to learn. In order to create an internationally competitive research and teaching environment, we are working to foster a culture of belonging, along with our focus on research excellence. With this in mind, the Strategic Plan for the Faculty of Social Science has four inter-related objectives. These objectives are: fostering teaching excellence, strengthening research impact, completing faculty and department renewal, and expanding outreach and advancement. For more details, refer to the [Western Social Science Strategic Plan 2016-2020](#).

## Teaching Excellence

We are committed to maintaining and improving our reputation for excellent undergraduate and graduate instruction. In 2015-16, 44 per cent of courses were taught by full-time faculty; in 2019-20, that number will be almost 75 per cent. Our ultimate goal is to have 80 per cent of courses taught by full-time faculty.

## Research Impact

We are committed to increasing our research output and quality, with the goal of cementing Western Social Science's place in the top 100 social science faculties in the world. We place particular emphasis on building excellence in empirical social science, as manifested in the launch of NEST. In 2018, 45 Tri-Council grants were awarded to faculty members, worth a full-term value of \$5,556,451.

## Faculty and Department Renewal

We are committed to hiring as many world-class tenure-track or tenured faculty members as possible. Through retirements and efficiencies since 2016, almost \$7.5 million has been made available in the annual budget. These funds are allocated to hiring tenure-track faculty.

By 2020, the Faculty of Social Science expects to make almost 50 tenured and tenure-track hires.

## Advancement and Outreach

We are committed to reaching our teaching and research goals with the support of our alumni and donors. Our priorities in the coming years include:

- The Social Science Distinguished Lecture Series
- Endowed Research Chairs
- A post-doctoral and visiting scholar program for NEST
- A new atrium for Social Science which would include expanded student space

# Teaching Excellence

The Faculty of Social Science is committed to providing exceptional learning opportunities for students.

In the coming years, the Faculty will review our undergraduate and graduate programming to take advantage of new opportunities and the expertise of our new hires.

In 2018, we introduced two new majors: Politics, Philosophy and Economics, and Management and Legal Studies. In 2020, we plan to introduce a new MA in Social Research for Policy and Practice.

## Politics, Philosophy and Economics

A high-quality, challenging and selective program, Politics, Philosophy and Economics (PPE) explores common themes in the three disciplines and provides students with an integrated understanding of the normative, political and economic dimensions of social welfare, the economy, institutions, and public policy.

The PPE program at Western University has its roots in a 100-year-old program at Oxford University that has created generations of leaders in business, government and the media. The PPE program prepares students for professional and graduate programs and for leadership roles in domestic or international politics, law, public policy, economics and business. Launched in the 2018-19 academic year, seven students were admitted into PPE-Economics stream and six students were admitted into PPE-Politics and Philosophy stream.

## Management and Legal Studies

The Management and Legal Studies module in DAN Management will be accepting students in September 2019. Designed in consultation with the DAN Advisory committee, the module will allow students to take courses from DAN Management and the Faculty of Law. The program has an enrolment cap of 50 students.

The purpose of this module is to prepare students for a broad array of careers in business in which understanding the impact of legal issues on business decisions and operations is critical to success.

## MA in Social Research for Policy and Practice

In the Fall of 2020 the Faculty of Social Science will launch a one year MA in the Network for Social and Economic Trends, in Social Science Research and Policy. This program will focus on the methodologies of social science research, and the implementation of evidence-based policy.

Core courses will include:

- Research Design
- Quantitative Research Methods
- Qualitative Research Methods
- Communicating Research
- Evidence-Based Policy Making and Program Evaluation
- and a Work Placement

Top 100

Social Science at Western moves to 84th in QS World Rankings – up 64 spots in five years!

Now Ranked 4th in Canada!

# Research Impact

## Network for Economic and Social Trends

nest.uwo.ca

On September 28, 2018, the Faculty of Social Science celebrated the opening of the Network for Economic and Social Trends (NEST).

Modern societies are experiencing unprecedented social and economic changes, including a slowdown in economic growth, rising inequality, and increasing ethnic diversity and geographic mobility. Our societies need new approaches and new solutions.

NEST, the flagship research and policy alliance in the Faculty of Social Science at Western University, is responding by:

- conducting world-class multidisciplinary research
- fostering national and international collaborations
- facilitating the training of the next generation of leaders in academia, the private and non-profit sectors, and government.

NEST is the umbrella organization for six of the Western Research Centres in the Faculty of Social Science. They set its agenda and provide its governance. These centres are: the Centre for Research on Migration and Ethnic Relations, the Centre for Computational and Quantitative Social Science, the Centre for Research on Social Inequality, the Centre for Human Capital and Productivity, the Centre for Transitional Justice and Post-Conflict Reconstruction, and the Centre for Urban Policy and Local Governance. Vicki Esses is the inaugural director of NEST.

To intensify the research excellence of faculty members in the Faculty of Social Science we need to remove barriers and create structures that encourage meaningful interdisciplinary collaborations. NEST provides both space and opportunity for more collaboration. By pooling intellectual and physical resources, our researchers will have more of an impact than any one researcher or research centre alone.

Members of NEST will apply advanced approaches to studying the changing social, political, and economic challenges facing Canada and the rest of the world. Through the use of rigorous empirical social science research, NEST will provide insight into policies to address issues such as economic development, prosperity, educational attainment, and migration.

Western is already home to some of the best social science research centres in the country – NEST will take them to the next level.

## NEST Centre Directors

### Centre for Computational and Quantitative Social Science

nest.uwo.ca/quant/

Dave Armstrong

CCQSS focuses on the cross-pollination of methodological techniques (both in terms of data collection and statistical analysis) used across disciplines.

### Centre for Human Capital and Productivity

nest.uwo.ca/chcp/

Lance Lochner

CHCP studies issues related to human capital and productivity, broadly conceived, and provides relevant economic policy advice.

### Centre for Research on Migration and Ethnic Relations

migration.uwo.ca/

Vicki Esses

MER facilitates research to inform public policy and practice on migration and ethnic relations in Canada and internationally.

### Centre for Research on Social Inequality

nest.uwo.ca/crsi/

Anders Holm

CRSI encourages, organizes and supports innovative social science research in the causes and impact of social inequality, investigating factors such as aging, gender, and health.

### Centre for Transitional Justice and Post-Conflict Reconstruction

tjcentre.uwo.ca/

Joanna Quinn

TJ Centre focuses on reconciliation, criminal accountability, post-colonial legacies, legal reconstruction, human rights, healing circles, and more.

### Centre for Urban Policy and Local Governance

nest.uwo.ca/urbancentre/

Zack Taylor

The Urban Centre responds to the many new challenges facing local governments and urban policymakers at all levels.

### Brain and Mind Institute

uwo.ca/bmi/

Ingrid Johnsrude, Director

The BMI provides a centralized and visible presence for cognitive neuroscience at Western, promoting research, facilitating the training of highly qualified personnel, and fostering national and international collaborations in cognitive neuroscience.

in Central Banking

**Geoffrey Wood**  
(New) Dancap Private  
Equity Chair in Change  
and Innovation

# Faculty and Department Renewal

## 16 New Tenure-Track and Tenured Appointments in 2018

**Laura Batterink**  
Assistant Professor  
Psychology  
  
PhD, University of Oregon, 2012

**Greg Beckett**  
Assistant Professor  
Anthropology  
  
PhD, University of Chicago, 2008

**Lindsay Bell**  
Assistant Professor  
Anthropology  
  
PhD, University of Toronto, 2013

**Lindsay Bodell**  
Assistant Professor  
Psychology  
  
PhD, Florida State University, 2015

**Blake Butler**  
Assistant Professor  
Psychology  
  
PhD, McMaster University, 2012

**David Calnitsky**  
Assistant Professor  
Sociology  
  
PhD, University of Wisconsin-Madison, 2016

**Scott Connors**  
Assistant Professor  
DAN Management  
  
PhD, Washington State University, 2018

**Patrick Denice**  
Assistant Professor  
Sociology  
  
PhD, University of Washington, 2016

# Faculty and Department Renewal

**Sean Hingston**  
Assistant Professor  
DAN Management

PhD, Schulich School of Business at York University, 2018

**Lene Kromann**  
Assistant Professor  
DAN Management

PhD, University of Aarhus, Denmark, 2011

**Diana Lewis**  
Assistant Professor  
First Nations Studies/Geography

PhD, Dalhousie University, 2018

**Bruno Salcedo**  
Assistant Professor  
Economics

PhD, Pennsylvania State University, 2016

**Samantha Joel**  
Assistant Professor  
Psychology

PhD, University of Toronto, 2015

**Agnieszka Leszczynski**  
Assistant Professor  
Geography

PhD, University of Washington, 2012

**Amanda Michaud**  
Associate Professor  
Economics

PhD, University of Minnesota, 2012

**Kasey Stanton**  
Assistant Professor  
Psychology

PhD, University of Notre Dame, 2018

# Advancement and Outreach

The Faculty of Social Science continues to make great strides toward achieving our ambitious goals.

With the support of alumni and donors, we are committed to fostering a strong research culture and creating the best learning experience at a leading Canadian research university.

Priorities include an endowed post-doc/visiting professorship program for NEST, and a significant renovation of the Social Science Centre that would include a new atrium meeting space for students.

Other main fundraising priorities include:

## The Social Science Distinguished Lecture Series

In 2018, we established the Social Science Distinguished Lecture Series. The ultimate goal is to create at least one endowed Distinguished Lecture for each Department.

In the past two years, we have secured funding for:

- The DAN Management Distinguished Lecture in Consumer Behaviour
- The DAN Management Distinguished Lecture in Corporate Governance
- The Regna Darnell Distinguished Lecture in Theory, Ethnography, and Activism in Anthropology
- The Balakrishnan Distinguished Lecture in Population Dynamics and Inequality

These lectures give our Departments, and the Faculty more generally, the capacity to host leading scholars from across the world on a regular basis. They connect our students, our faculty, and the broader community to world-class scholars, and build both our research culture and our research networks. We continue to seek funds to create new endowments.

## Endowed Research Chairs

As part of our strategic plan and our focus on research excellence and departmental renewal, each Department in Social Science has identified research specializations. Specialization allows our Departments to excel in particular research areas by building on existing areas of strength. Our goal is for each Department to be the best, or among the best, in Canada in at least one signature area of research. The Departments' areas of strength are outlined in the Department sections, later in this report.

To support this goal, we are seeking funds to support endowed Research Chairs in the strategic areas identified by each of our Departments. Over the past three years, we have secured funding for four endowed research chairs for the Faculty of Social Science:

- Dancap Private Equity Chair in Consumer Behaviour (DAN Management)
- Dancap Private Equity Chair in Change and Innovation (DAN Management)
- Dancap Private Equity Chair in Corporate Governance (DAN Management)
- The Stephen A. Jarislowsky Chair in Central Banking (Economics)

Our priority is to establish chairs to yield first-rate empirical academic research with real-world policy implications. We continue to seek support and gifts for at least one endowed chair for each Department.

Western Anthropology stands out in Canada because of its strong representation of all four subfields of anthropology and the close collaborations that occur across our program streams, producing boundary-crossing faculty and graduate student research.

Our department is in an exciting phase of renewal, with a quarter of our 16 faculty members consisting of newly-hired colleagues, following a number of retirements. Our main aim in the immediate future is to integrate fully our new colleagues into the operations and vision of the department.

In the medium term our goal is to explore exciting new directions, interconnections, and dimensions of anthropology we collectively represent as a department, and the opportunities these new directions will offer for students in our graduate and undergraduate programs. For instance, plans are underway for the development and integration of a number of departmental lab spaces under the umbrella of an Integrated Bioarchaeology Research Facility that will foster the innovative research and student interaction that comes from creating a hub for people researching the diversity of bioarchaeological science in one place.

These changes will also inform our longer-term planning for the department to envision what our areas of research and teaching strengths – existing and emerging – will be over the next ten years. We expect to enhance our leadership in collaborative anthropology, refining what it means to advance world-class research in archaeology and bioarchaeology in the 21st century, and identifying emerging areas of strength such as critical approaches to humanitarianism, among others.

Building on our department-wide commitment to excellent undergraduate teaching and our strong record of experiential learning in all subfields, in 2018 we celebrated a second university-wide teaching award in two years, Lisa Hodgetts' Edward G. Pleva Award for Excellence in Teaching. We also congratulated recently-retired colleague and Professor Emeritus Chris Ellis for his James V. Wright Lifetime Achievement Award from the Ontario Archaeology Society.

Our biological anthropology faculty, graduate students and undergraduates welcomed colleagues from across Canada and around the world to the successful fall 2018 annual meeting of the Canadian Association for Physical Anthropology, and Professor Emerita Regna Darnell led an innovative conference on Land, Language and Locatives in December.

# DAN Department of Management & Organizational Studies

Exciting change is about to occur in DAN Management. Professor Geoffrey Wood has been appointed as the Chair of the DAN Department of Management & Organizational Studies, effective July 1, 2019. Wood is a Fellow of the Academy of Social Sciences, and a Fellow of the British Academy of Management. He is currently the Dean and a Professor of International Business at Essex Business School at the University of Essex. Wood will also be appointed as Dancap Private Equity Chair in Change and Innovation. He will replace Dan Shrubsole, who has been Interim Chair since July 2018.

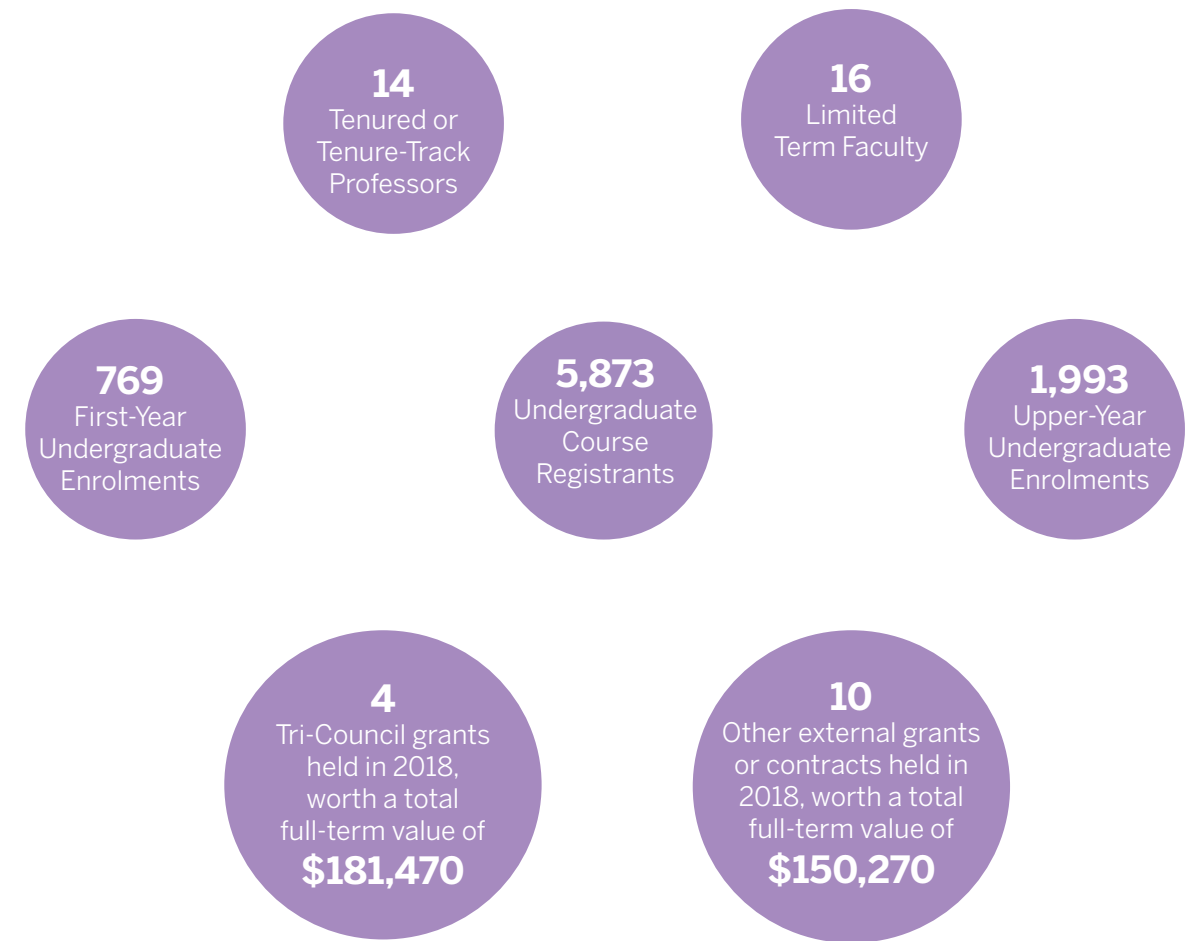

With almost 3,000 undergrads, DAN Management is one of the largest and most vibrant undergraduate programs at Western. It is also increasing its focus on research, supported through the appointment of tenure-track faculty.

During the past year, the Department has successfully hired two of the three Research Chairs that are funded through a generous \$5-million donation from Aubrey Dan.

In addition to Geoffrey Wood's Research Chair, we have hired a second Research Chair in the area of Corporate Governance, which will be a joint appointment with the Faculty of Law.

DAN Management introduced a Graduate Diploma in Accounting Program (G-Dip) in 2016. The G-Dip is a 3-month program, offered in the summer and accredited by CPA Ontario. Students who successfully complete the program can enrol in the CPA Professional Education Program at the Capstone level. This can reduce the time from graduation to the CPA Comprehensive Final Examination (CFE) by a full year. We expect the program to grow, and to offer it both in the summer and in the regular academic year.

**Aubrey Dan and students in the DAN Management program**

Western Economics' strategic goal over the last five years has been to become a Top 30 Economics Department in the world. To gauge our progress we use a RePEc ranking measure based on the number of journal pages generated by departments, weighted by the impact of the journals and by the number of authors.

In 2018, Western Economics achieved that goal by moving up to 29th in the world and 8th in North America. Western is 3rd in Canada, close behind UBC (22nd) and Toronto (25th), and farther ahead of Queen's (ranked 44th in the world and 4th in Canada). These gains were achieved through hiring primarily in the core areas of economics – macroeconomics, microeconomics and econometrics – and in the Department's chosen area of research strength: Human Capital and Productivity.

To continue to excel at this level, the Department is focused on hiring and retaining top researchers, supporting their research, and training the next generation of economists. In 2018-19, the Department of Economics welcomed two new faculty members. Associate Professor Amanda Michaud came from Indiana University in September 2018. Amanda specializes in macroeconomics. Full Professor Juan Carlos Hatchondo, also from Indiana University, joined the Department in January 2019. Juan Carlos does research in the field of international economics.

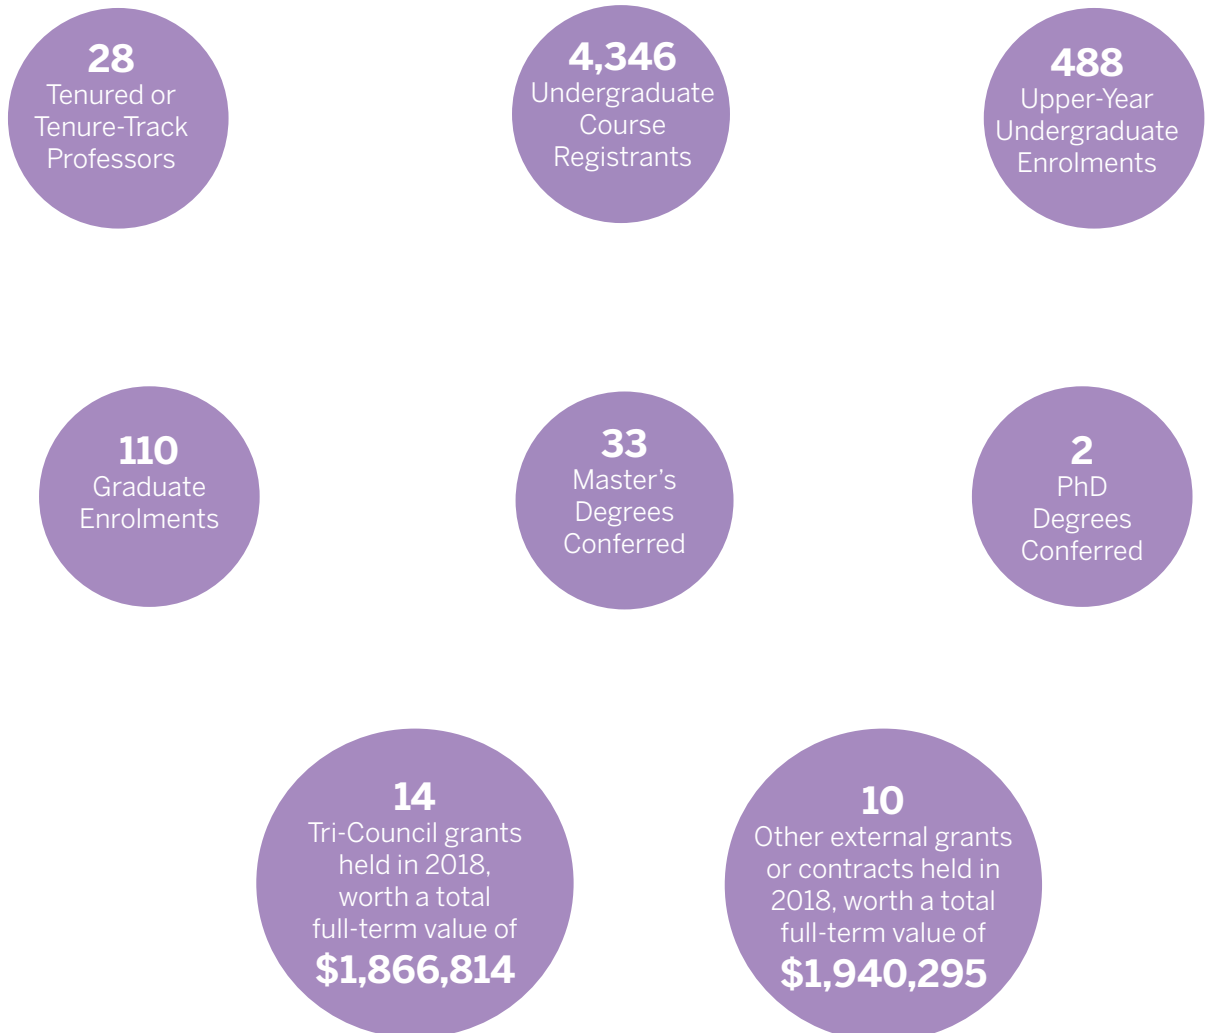

Currently the Department is recruiting for positions in:

- financial economics and financial econometrics to support the Master in Financial Economics (MFE) program; and
- macroeconomics, international trade, econometrics, labour and industrial organization to support our core research and teaching areas.

The Department is pleased to have expanded its exchange program offerings for undergraduate students. Our new exchange partners include Keo University in Japan and Radboud University in The Netherlands. In addition, we had 13 students enrol in the new Politics, Philosophy and Economics Honors program.

Our graduate programs produced a number of students in 2018, who were placed in academic, government and private sector jobs. We offer a wide range of programs and encourage students to contact our graduate offices and visit [economics.uwo.ca](http://economics.uwo.ca) for more information.

## 2018 Quick Facts

The big focus in Geography over the past year has been the preparation for our Undergraduate Program review. It has prompted a broader review of our undergraduate program curriculum and courses, with the broad goals of having modules and courses that fit our faculty complement, increasing the recruitment of undergraduate students into our programs, and maintaining the student experience we provide.

We have begun with a renewal of our GIScience curriculum, led by our two new faculty members in the area. The renewal coincides with the completion of a new GIScience computer-based instructional facility that increases our capability and capacity for delivering curriculum with computing intensive demands and with our recent designation as an ESRI Canada Centre of Excellence. We plan to make another tenure-track appointment in GIScience in 2019-20.

To increase enrolments we have been engaged in re-branding and invigorating Geography as a field of study at Western. Steps we are taking include:

- Initiating an external Advisory Board and annual recruitment event for our Urban Development Program to emphasize the career-related focus of that program and engage our program Alumni
- Planning for a 'High School' day that will target Grade 11 high school classes for recruitment
- Engaging with the Western student recruitment office to help promote the range and breadth of Geography modules and to ensure that prospective students – including those with interests in science and the environment – recognize that we offer BSc degrees through Geography.

We have already been raising the profile of the environment theme by integrating it in our first-year course titles and by developing modules like our Major in Environment and Health to emphasize that Geography is a primary discipline for studying the environment in all of its socio-physical dimensions.

# History

The History Department is known for its expertise in Canadian, American, International and Public History. Our faculty communicate their ideas in many ways: writing books and articles for specialist and general readers, writing blogs, publishing op-ed columns, giving interviews to the media, consulting on films, documentaries, and the new ten-dollar bill, creating online exhibits, curating public shows, and building databases. They regularly receive awards in recognition of their scholarly work, most recently international book prizes, a Hellmuth Prize for Achievement in Research, and an appointment to the College of New Scholars, Artists and Scientists.

Faculty in the History Department are dedicated and innovative teachers. The department was delighted that Mike Dove and Michelle Hamilton, who lead the Public History program, received the Vice-Provost Award for Excellence in Collaborative Teaching. New courses are being developed to capture new approaches to the study of the past. The historians at Western take seriously their responsibility to teach students how to write effectively, but are also integrating high-impact teaching strategies into their courses, creating assignments that allow students to broaden their skills, and developing experiential learning opportunities. The department is also reaching out to prospective students by hosting an annual High School History Day that introduces grades 10, 11 and 12 students to the study of history in university.

There is a robust and collegial graduate community in the department. Students in the MA program complete either a one- or two-year program. Students in the two-year program write a 25,000 word thesis that allows them to explore a topic in depth and produce a serious piece of research and analysis. Public History students have benefitted from the expertise of Dr. Ariel Beaujot, a visiting professor from the University of Wisconsin La Crosse for the year, in developing *Hear, Here*, a project with the City of London that will capture everyday stories of the SoHo neighbourhood. Doctoral students are presenting their research at national and international conferences, winning major grants, and making names for themselves as future leaders in their fields.

**Students participate in the Annual High School History Conference**

**Students examine items from the Medical Artifact Collection. The collection holds more than 1000 artifacts related to the history of health and medicine in Ontario**

# Political Science

In 2018, the Department of Political Science undertook the search for a new Chair with the goal of moving the overall research profile of the Department forward.

We are delighted to have Matthew Lebo joining us to assume this position, in August 2019. An exceptional researcher, Lebo also brings a wealth of administrative experience, having served as Chair of the Political Science Department at the State University of New York, Stony Brook. He will replace Charles Jones, who filled in as interim chair since July 2018.

The Department of Political Science has three strategic goals.

The first goal is to be the foremost destination for research and graduate training in three Signature Research Fields – Multilevel Governance; Global Justice and Democratic Engagement, and Political Behaviour and Methodology, our newest area of strength.

The second goal is to make tenure-track and tenured faculty appointments that further strengthen the Signature Research Fields. During 2018-2019, for instance, we appointed an excellent political theorist, Elizabeth Finneron-Burns (D.Phil, Oxford), to add to our complement of Global Justice research experts, and in January 2019, we welcomed Mathieu Turgeon, an expert on political behaviour, political psychology, and statistical and survey methodology whose work has been published in four languages – English, French, Portuguese, and Spanish – and covers Latin America, France, Brazil, the United States, and Canada.

The third goal is to increase the proportion of faculty members holding SSHRC funding. We can achieve this goal by strongly encouraging more faculty applications for SSHRC funding. As part of this strategy, we are developing stronger links with the Faculty of Social Science's research office, including periodic formal discussions with our faculty members about SSHRC opportunities.

**Nigmendra Narain delivers an undergraduate lecture**

Our goal is to maintain and increase our stature as an internationally leading research-intensive Department of Psychology, with excellence in graduate and undergraduate education.

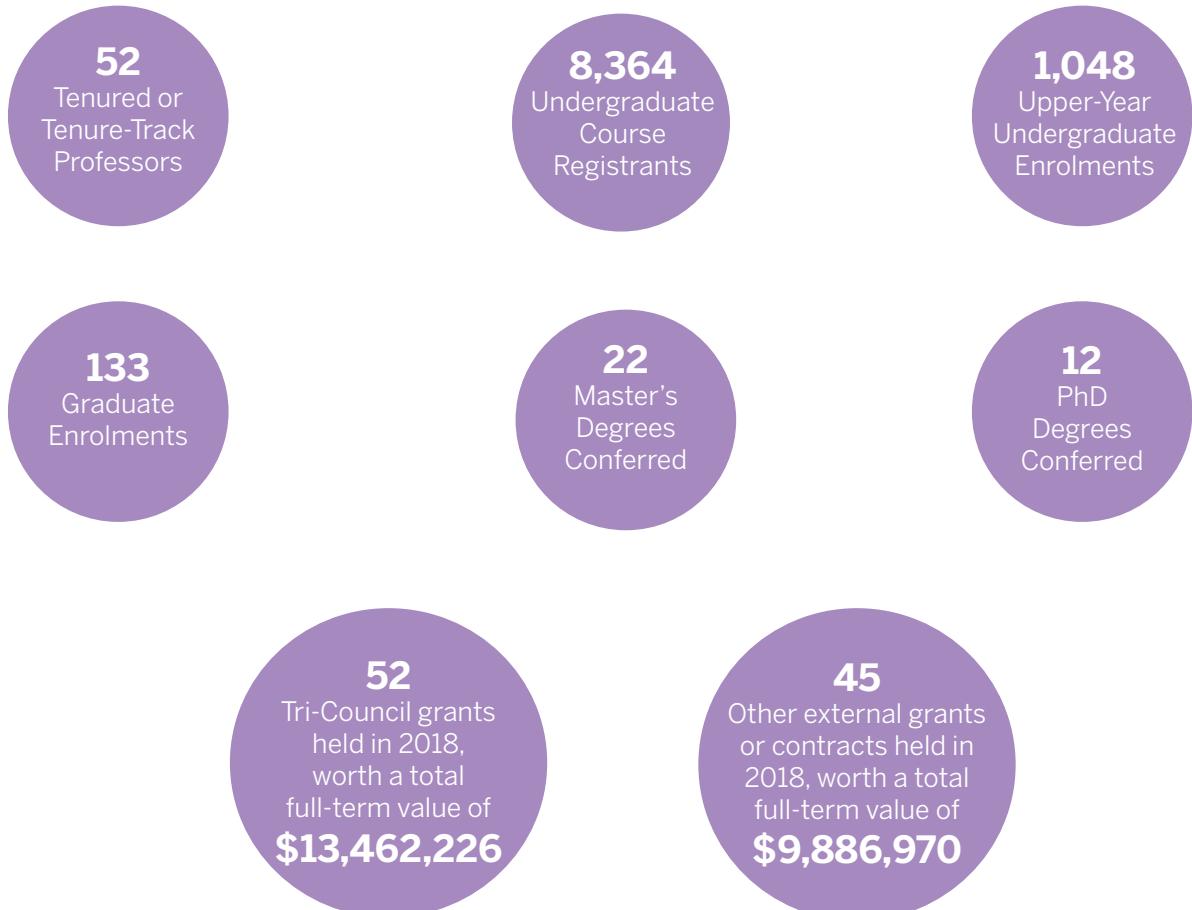

The age structure of our department has necessitated aggressive renewal with junior and mid-career faculty in key research areas. The department has been strategically hiring faculty in areas of existing and emerging research strength. We prioritize areas with high research impact that attract excellent graduate students, and allow us to offer our comprehensive undergraduate curriculum, which continues to attract high course enrolments at this level of education.

The main focus for Psychology in 2018 has been on faculty renewal. Our department is in the midst of a wave of retirements that has been ongoing for years and will peak in 2019. We have six new faculty members whose research spans social psychology, organizational psychology, psychopathology, and neuroscience.

We continue to be ranked in the top 100 Psychology Departments in the world (QS Rankings) and in 2018 Western Psychology was ranked as the #2 Psychology Department globally based on citations per paper.

Our research continues to have impact.

The Department of Sociology's first goal is to raise our research profile and cement our position as both the top quantitative research department in Canada, and a centre for research excellence in Population Dynamics and Social Inequality. We welcomed a new faculty member, Patrick Denice, with expertise in Social Inequality, and we are looking for another hire in this area as well. Our reputation in this area is growing, and we expect to see it continue to rise over the next few years.

Our second goal is to improve our ability to recruit more high-quality students specializing in quantitative data analysis and social inequality. We are already seeing a pay-off from our efforts in terms of recruitment of quantitative researchers and applicants from outside Western. We have also made program changes to improve students' methodological and statistical training at the Master's level especially. We have changed both the content and sequencing of courses and have offered new courses. These changes continue to support our research and graduate program goals.

Finally, we are refining our undergraduate options with the goal of ensuring that students receive high-level training methodologically, theoretically, and substantively, while continuing to reduce our reliance on limited duties instructors by moving tenure-track faculty into required courses as much as possible. In 2018 we launched a revised criminology module, and we are in the process of revising our theory courses. This continues to be a work in progress, but one that should result in a more effective and efficient undergraduate program for Sociology and Criminology students both.

# Women's Studies and Feminist Research

Women's Studies and Feminist Research occupies a unique position at Western due to the inherent interdisciplinarity of our field(s). Not only are we located in two Faculties, Social Science and Arts & Humanities, but both our faculty and our students come from a wide disciplinary range. We have faculty members jointly-appointed with the Faculties of Health Science and Information & Media Studies, as well as a currently unfilled appointment with Law. While the majority of our students are registered in the Faculty of Social Science, significant numbers come from both Arts & Humanities and FIMS, with smaller numbers from pretty much every other Faculty, including Science, Music, Engineering and Ivey.

We have achieved positive growth for the program by strategically modifying the undergraduate curriculum to create a program that makes sense and provides students with reasonable levels of choice. We have also worked toward training and mentoring students to acquire research skills. This has resulted in a very significant increase in the number of students writing honours theses. It has also resulted in the peculiarly positive result that our students who go on to graduate programs in other universities complain that they're not encountering anything new. We have also worked toward expanding internship opportunities for undergraduates by adding a course on Feminist Activism. Students taking that course have interned with Anova, Mission Services, OptimismPlace, ClothingWorks, Pads for People, and the Alice Munro Chair.

We plan to continue to strengthen our undergraduate program and build on its successes, which include a Rhodes Scholarship in 2018 and three to four students a year with papers recognized in the Undergraduate Awards. Our graduate students have also been successful in grant competitions, with five PhD candidates receiving SSHRC scholarships this year. Our faculty have also done well in teaching, with a successful 3M nomination for Wendy Pearson and an Arts & Humanities Teaching Excellence award for Nichole Edwards.
